Presents

ISO 14001 INTERPRETING AND IMPLEMENTING an Environmental Management System

This two-day course is aimed at companies involved in implementing an ISO 14000 Environmental Management System (EMS). Through a review of the background and development of the standard along with in-depth analysis of its components, students will learn how to interpret ISO 14000, develop an implementation plan and prepare documentation which is compliant with the standard. Case studies are used to provide working examples throughout the course. Included is a compare/contrast review of ISO 14001 to: ISO 9001; EMAS (European Eco-Management and Audit Scheme); and NSF 110, an American environmental standard.

CONTENT OVERVIEW

- **Background**
- **History of ISO and Global Standardization**
- **Development of the ISO 14000 series of Standards**
- **Similarities to NSP 110**
- **Similarities to ISO 9000**
