

# PRODUCT CERTIFICATION

## **The Five (5) W's of Product Certification**

# WHAT is Product Certification?

- This is the process involved in ensuring that a product conforms to a standard.
- For TTBS the process involves Assessment, Testing and Surveillance of the Production Process and Quality Management System.
- On TTBS approval a one year License is granted for the product to bear the TTBS Product Certification Mark.

# WHY Should I Certify?

- To give the public the assurance of a consistent and quality product.
- To give your product wider acceptance in a foreign market.
- To save money by improving your processes and systems.
- To fulfill local, regional and International Governmental requirements.

# WHEN should I certify?

ANYTIME !

- When you are ready to commit to Quality !
- When you are ready to improve your Quality Management System !
- Call TTBS !
- Complete an application and Self Evaluation questionnaire and on TTBS approval the process begins.

# WHERE does Certification take place?

- The process takes place in three places
- At TTBS - We research your company.
- At your premises -We audit your Quality Management System and Sample and Test your product.
- In the market place -We sample and test product to ensure continued conformity.

# WHO can Certify their Product?

## ANYONE !

- If you are a Manufacturer of the Product
- If you are a Distributor of the Product

# TTBS CERTIFIED PRODUCTS
